Faculty:

Dr. Effie Habsha (Prosthodontist)

**Tuition includes*
A complete Brasseler Crown & Bridge
Bur kit, some of Crest Oral B's latest
Innovations, other items from our
sponsors (over \$500 value)*

This fixed prosthodontics hands-on training program is perfectly suited for the early and mid-career general dentist, focusing on both the analog and digital workflows available today for the management of indirect restorations for the single tooth and the short-span fixed prosthesis.

Participants will gain didactic and hands-on experience on diagnosis, treatment planning with digital smile design, tooth preparations, provisionalization, impression taking (both conventional and digital) and cementation, in the provision of single crowns, inlays, onlays and short span bridges. The strengths and limitations of a variety of dental prosthodontic materials will be discussed and handled in our state-of-the-art SIM LAB.

Genesis Continuing Dental Education
Nationally approved PACE Program Provider
for FAGD/MAGD credit. Approval does not
imply acceptance by any regulatory authority,
or AGD endorsement. 10/1/2021 to 9/30/25
Provider ID#377199

LEARNING OBJECTIVES

- Compare and contrast the strengths and limitations of existing analog and digital workflows in fixed prosthodontics.
- Introduction and hands-on training in Digital Smile design.
- Hands-on exercises including: preparation, provisionalization, impression taking (digital and analog) and cementation of single indirect restorations (single crown, inlay onlay) and the short-span fixed prosthesis.
- Update on the latest advances in digital workflows.
- Discussion on best practices for management and maintenance of oral health, avoiding complications and meeting patient expectations.
